

North Tarrant Express Right-of-Way Recovery

Fort Worth, Texas

CobbFendley is providing parcel acquisition services for the North Tarrant Express, Segment 1. The high-profile, \$2.02 billion North Tarrant Express project will rebuild and expand 13 miles along I-820 and SH 121/183 from I-35W to the SH 121 split, add four toll-managed lanes, plus frontage roads and auxiliary lanes to approximately double the existing capacity. As the right-of-way and surveying consultant, CobbFendley is responsible for mapping approximately 115 parcels, as well as nine miles of right-of-way recovery and verification. In order to complete this fast-track project ahead of schedule CobbFendley transformed existing products to conform to the unique Concessionaire Design Agreement (CDA) requirements. While navigating multiple review agencies for approvals and multiple consultants, stringent milestone goals were met that allowed right-of-way agents to provide crucial data for the acquisition process.

Project Length:

13 miles

Completion Date:

January 2012
