

IH 635 – LBJ Managed Lanes Project

Dallas, Texas

CobbFendley is providing Subsurface Utility Engineering (SUE), Utility Coordination, Utility Engineering Design and Utility Adjustment Monitoring and Verification services for the LBJ project, which will relieve severe congestion on 13.3 miles of IH 635 (LBJ) from just west of IH 35E (near Luna Road) to just east of US 75 (near Greenville Ave.). CobbFendley has performed over 300,000 LF of SUE Quality Levels B, C, and D, over 300 test holes to date, and has provided SUE plans and test hole data sheets.

Project Length:

Approximately 13.3 miles

Completion Date:

April 2012
